

# fix windows files

1. start CMD or PowerShell in admin mode
2. type or past
  - sfc /scannow
3. restart pc
4. regardless if it fixes stuff, then do
  - DISM /Online /Cleanup-Image /RestoreHealth
5. when its done restart
6. then do
  - sfc /scannow
    - again
7. then restart
  1. and boom all of your corrupt files should be fixed
8. u could do
  - DISM /Online /Cleanup-Image /RestoreHealth
  - again and restart but that's up to you
