

Via Registry Editor

- "DISCLAIMER" This method should only be used if you have experience with editing the Windows registry.

1. Open the Registry Editor by pressing the Windows key + R and typing "regedit" in the Run dialog box.

2. paste these into the URL bar

1. HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Run

2. HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\RunOnce

3. HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Run

4. HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\RunOnce

- OBVIOUSLY local and current users are different

- HKEY_CURRENT_USER

- is for the logged in user and

- HKEY_CURRENT_USER

- but you also have

- HKEY_USERS

- this is for other users on the pc
- HKEY_USERS\useridgoeshere\SOFTWARE\Microsoft\Windows\CurrentVersion\Run
 - if you have allot of users on your PC u might just want to loginto there acct by admining them and changing there password
- Remember to only disable apps that you're sure you don't need, as disabling the wrong program could cause problems with your system.
