Via System Configuration:

1. Windows key + R to open "Run"
    1. type the fallowing program name then click Enter.
2. msconfig
3. Click on the "Startup" tab to see a list of programs that start automatically with Windows.
    1. Disable the ones you don't need by unchecking the checkbox next to them.
    2. if you are running into extensive issues you may need to enable diagnostic startup and see if you still have problems
