What most people think of me

The blood witch is a being with immense magical power who has been known to kidnap children from various cultures and factions across Taurosia. It is said that she consumes the blood of these children in order to extend her own life and enhance her magical abilities. Those who are taken by the blood witch are often returned home, but are significantly weaker and bear scars and bruises as if their life force has been drained. The blood witch is a figure shrouded in mystery and fear, with many families living in terror of their children being taken during the summer solstice. Those who have lost a child to the blood witch are left with the heart-wrenching pain of never truly knowing what happened to their loved one.
