Welcome to week 1

Hi again! Now that you have some idea of what to expect from the program as a whole, let's discuss more about what you'll learn in this course.

0:11

This course will introduce you to the world of security and how it's used to protect business operations, users, and devices, so you can contribute to the creation of a safer internet for all.

0:24

In this section, we'll cover foundational security concepts. First, we'll define security. Then, we'll explore common job responsibilities of security analysts. Building on that, we'll cover core skills a security analyst may have. Finally, we'll discuss the value of security for protecting organizations and people.

0:48

Later on, we'll cover eight security domains. Then, we'll cover common security frameworks and controls. Finally, we'll wrap up the course by discussing common tools and programming languages that entry-level security analysts may use.

1:06

Coming up, we'll go over some resources that will allow you to get the most out of this program. I'm really excited for you to start this journey--let's begin!
