Course 8 content

Each course of this certificate program is broken into modules. You can complete courses at your own pace, but the module breakdowns are designed to help you finish the entire Google Cybersecurity Certificate in about six months.

What's to come? Here's a quick overview of the skills you'll learn in each module of this course.

Module 1: Protect data and communicate incidents

You will recognize the importance of security professionals in the workplace. You'll discover how proper detection and escalation can impact an organization's security posture.

Module 2: Escalate incidents

You will explore the importance of incident prioritization and escalation. You'll learn how the decisions security professionals make help to keep business operations safe.

Module 3: Communicate effectively to influence stakeholders

You will learn about important stakeholders in cybersecurity. In addition, you'll create clear and concise communications to stakeholders.

Module 4: Engage with the cybersecurity community

You will learn how to stay up-to-date on the latest cybersecurity trends and explore how to engage with the security community.

Module 5: Find and apply for cybersecurity jobs

You will prepare for your job search. You will explore career readiness techniques, such as creating a resume, developing an elevator pitch, and preparing for the interview process. Finally, you'll use career resources that can help you find and apply for jobs in cybersecurity.
