# Set the merge driver for project and solution files  
#  
# Merging from the command prompt will add diff markers to the files if there  
# are conflicts (Merging from VS is not affected by the settings below, in VS  
# the diff markers are never inserted). Diff markers may cause the following  
# file extensions to fail to load in VS. An alternative would be to treat  
# these files as binary and thus will always conflict and require user  
# intervention with every merge. To do so, just uncomment the entries below
