Example 3 + up/down test

image.png

up/down test

- opens upwards because a is Positive
- opens downward because a is Negative

Example 3

1. a) y= x^2 + 3x + 4
   - opens upwards because a is Positive
2. b) y = -3x^2 + 5x
   - opens downward because a is Negative
3. c) y = 2x - x^2 + 6
   - opens downward because a is Negative
